

Calf Lick Feeder – 1 Tonne

(Product code: LFSF24C)

Product Overview:

The Paton 1 Tonne Feeder is the ideal grain/pellet feeder designed for calves to young weaners.

Featuring two 2400mm troughs, capable of handling 10 – 12 calves at any one time. This unit will easily handle a standard bulk bag and its paddock application would see it placed in a calf rearing environment either in small paddocks or penned areas. It will be able to dispense supplement feed for growing or finishing calves while the adjustable feed doors can be opened to suit the varying feed types. Larger troughs for bigger heads makes this feeder a useful tool on any dairy farm or for rearing beef calves.

The external frame surrounding the feeder gives the unit extra strength and avoids tractor damage when handling and moving the feeder. The overall low profile of the feeder also stops the twists and bows that can occur when taller feeders are placed on rough or uneven ground, or while transporting with tractors from paddock to paddock. A solid and independent subframe keeps the feeder stiff and structurally strong and provides a perfect platform for carrying the feeder on the front of tractor forks.

Also available as an easy to tow model.

KEY FEATURES

- 2 x 2400mm length troughs
- Trough depth and width designed for cattle
- Wide access opening lid
- Adjustable feed doors
- Feed view windows
- Supporting base frame
- Internal bracing
- Tractor bump rails
- Laser cut precision
- 100% galvanised construction
- Designed for grain, pellets and mixed feed rations

Dimensions: 2.4m (L) x 1.5m (W) x 1.4m (H)
