SHEEP LICK FEEDER 1 TONNE CAPACITY

Product code: LFSF24S

APPLICATION

The Paton sheep feeders will improve stock health and enable greater stocking rates.

These are an excellent management tool for feeding supplements to sheep. They improve growth rates compared to stand-alone grass fed grazing, while reducing pasture pressure.

This 1 tonne model will service up to 150 sheep in a grazing environment.

The build quality is the best in the market with the latest rivet technology and laser precision.

A wheeled model is also available to tow to the silo for filling, then out into the paddock.

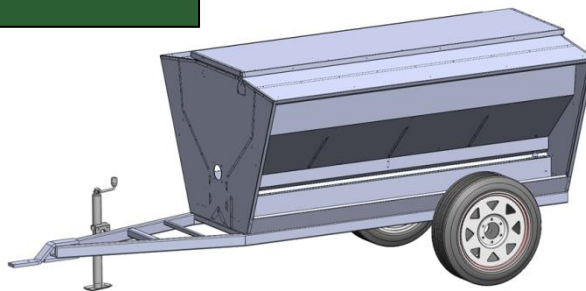

FEATURES

- Adjustable feed doors
- Viewing windows
- Independent base frame
- Additional weather verandahs
- Internal structural baffles
- Hinging lid for easy filling
- Wheeled options available
