

Sheep Lick Feeder – 3 Tonne

(Product code: LFXLF24S)

Product Overview:

This unit is designed specifically for sheep and features two 2400mm troughs, capable of handling 16 ewes feeding at any given time. The Paton lick doors are fully adjustable from closed position to 6" opening with a simple turn of the supplied spanner.

Unlike other feeders, due to the designed lick door this feeder is suitable for feeding grain, pellets or heavy chopped and mixed feeds. The specially designed sheep troughs have no sharp edges whilst keeping spillage to a minimum and allowing good access to the lick doors.

Don't muck around with an imported light weight feeder, our 3 tonne sheep feeders are built from fully galvanised steel and sheet and built tough to last.

The reinforcement surrounding the unit prevents operator damage and a strong supporting sub-frame provides the ideal lifting platform for your tractor forks.

The unit is fully weather proof and with easy access for filling provided via a large, hinged swing open lid and step ladder for cleaning or refilling.

We stand behind our products, 55 years of design, experience, engineering and development has gone into this proven design. So put one to the test today.

KEY FEATURES

- Heavy reinforcement under verandas to eliminate tractor damage
- Strong sub-frames to provide the ideal lifting support when moving the unit
- Easy to adjust lick doors
- Suitable for grain or sheep pellets
- 100% galvanized construction
- soft on the mouth and easy to clean trough profile
- Lower sub-frame to suit sheep

Dimensions: 2.4m (L) x 3.2m (W) x 1.9m (H)
