

## Biscuit Hay Feeder – 2.4m

(Product code: LFHF24S)

### Product Overview:

These feeders are specifically designed for high quality small square bales that can be broken up into biscuits and thrown into the feeder. Animals can then access the hay through the vertical bars and pull through feed as required.

A trough is positioned below the bars to capture falling hay and so virtually eliminates all wastage.

This handy little unit is fully galvanised for longevity, is weather proof with a large verandah to keep your feed dry and has a swing open lid for easy access for refilling.

With a strong sub-frame, relocating is easy with the forks of your tractor or tow the unit easily behind your ATV or utility with the tow lugs.

This feeder would comfortably suit a mob size of around 30 calves.

### KEY FEATURES

- Fully galvanised finish
- 2 x 2400mm troughs
- Weather verandah
- Swing open lid
- Vertical bars to enable easy access
- Floor trough to capture loose material
- Strong supportive sub-frame
- Designed for small square bales
- Ideal for high-value lucerne bales

Dimensions: 2.4m (L) x 1.5m (W) x 1.4m (H)
