

## Product code: CCPREM24 & CCPREM48

### APPLICATION

The Cattle Caller allows you to control the amount of feed delivered by setting the desired feed weight quantities and delivery times.

In operation, the pre-set feed drop simply falls onto a feed table, the cattle are 'called' and then feed is consumed. This process means fresh feed is available for stock consumption, at the most optimal times of the day and in minimal measured amounts.

### FEATURES

- Industrial Control System with colour touch screen
- Fail safe - double feed door system
- Scheduled daily feed times
- Siren calling to cattle
- 2 tonne capacity
- Independent solar and battery powered
- Low voltage battery protection
- SMS notification available
- **Available in two models (2t and 4t)**

### BENEFITS

- Safely feed high energy grain or pellets with accurate ration control
- Stops gorging and wastage of valuable feed
- Enables increased stocking rates in less productive pastures
- Provides consistent and reliable portion control of fresh feed
- Stops overfeeding = reduces feed costs
- Uneaten feed is automatically deducted from the next feed delivery
