

Product code:
FTPOULTRY8M

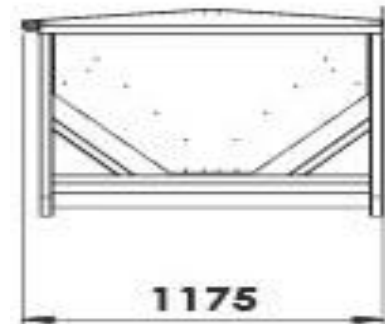

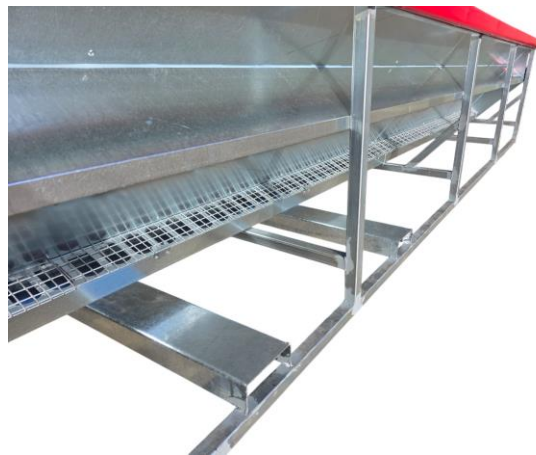

APPLICATION

This trough is designed for feeding free range birds on a larger scale. The size and length of the unit invites an improved participation of large numbers of birds. The low profile of the trough and the wide opening under the canvas cover makes filling simpler and provides easy access.

FEATURES

- 14.4m of feeding area
- rain verandahs
- Skid base
- Roll tarp cover
- Forklift tynes
- Low to the ground means easy filling
- 2.2 tonne capacity
