

Creep Gates

(Product code: LFLFCG)

Product Overview:

Control lick feeder access for your stock with Paton's Creep Gates.

These gates are built to size to suit any Paton Lick Feeder and the chosen animal profile of the feeder.

These handy creep gates enable young calves or lambs still on their mothers to access feed. This means calves or lambs pre-weaning can get extra supplement as they move from a milk-fed diet onto grass and other available feed. These gates keep the mothers out of the feeding area and allow calves or lambs full access to the grower pellet or grain.

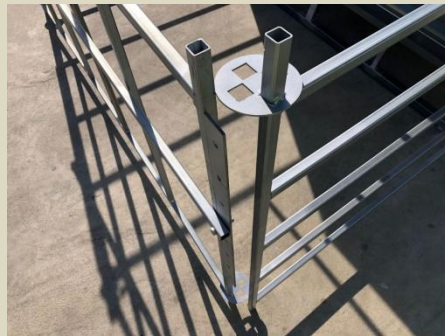

Fully adjustable horizontal bar allows you to enable smaller stock access whilst restricting larger stock.

Approximate Gate Spacing: Example only – sizes can be made to order.

5 Gates: Approximately 450mm.

4 Gates: Approximately 570mm.

3 Gates: Approximately 770mm.

KEY FEATURES

- Star picket brackets to firmly fix unit to the ground
- Height adjustable
- Fully galvanised construction
- Suitable for calves, cattle, lambs, sheep
