

Ewe Lift ATV Trailer 5'x4'

Product Overview:

Our Paton Ewe Lift ATV Trailer is designed to eliminate the backbreaking job of lifting heavy sheep or calves into the back of your ute or trailer.

The Ewe Lift is designed with drop stubs allowing the wheels to pivot away from the chassis allowing the trailer deck to lower to ground level. This action makes it considerably easier to lift and carry stock when they are cast or sulking and just refuse to move! Also ideal for mismothering ewes and lambs who can now be penned inside the trailer and the trailer left in the paddock as a temporary paddock pen.

The trailer is lowered and raised using the lifting arm or using the winch attached to the drawbar. The 1200lb winch allows even the heaviest ewes to be raised with ease and done in a safe and steady manner.

The Ewe Lift provides easy access for the stock with the trailer featuring a rear slide gate that opens the $\frac{3}{4}$ width of the unit and a handy internal gate is fitted to drive stock when required. To shelter animals within the trailer from wind and mud the front panel is covered, so animals do not get splashed from the vehicle in front.

The trailer has been tested and designed to take constant paddock use and has been built strong to last.

Save your back for sinking into your favourite couch and let the Ewe Lift do the hard work for you. Put one of these game changing ATV Trailers to the test today.

All ATV trailers come with a handy on-board tool box.

Unit Dimensions:

- Length (inc drawbar): 3425mm
- Width: 1850mm
- Height: 1400mm
- Stock Crate Height: 780mm
