

Feed Pad – 100 Head Unit

(Product code: BFFPP100)

Product Overview:

Make your dollar go further with a Paton 100 Head Feed Containment Pad to maximize your feeding potential.

The design of the feed containment walls provide a flexible option to farmers wanting to dedicate an area for dry feeding cattle with hay or silage. These hoop styled panels keep the feeding area clear and unspoilt so animals can lean in and access clean fresh feed.

The largest of the Feed Containment Kits, designed for the serious dairying or feedlot enterprise. 100% Galvanised Steel and built to last.

100 Head Kit Contains

- 5 x flat panel sets - each set adds 20 head spaces
- 2 x curved end panels
- Stay bars to stiffen and strengthen the whole unit once assembled
- Pins to interlock all the panels and stay bars together
- Ground pins to brace the unit into the ground

Key Benefits

- Eliminate spoilage and hay wastage
- Maximise feed potential and value
- Minimise pasture damage by dedicating a feed area

Additional panels can be purchased to increase your containment length by 6m.
