

# Sheep Hay Cradle – 4m

## Half Skirt Sheet and Half Skirt Mesh Bases

### Product Overview:

The sheep cradles are lower than the cattle variant giving lambs and adult sheep better access to the hay. These cradles prevent sheep having a free for all to sleep and walk in the hay. Now the cradle keeps your feed elevated whilst the base captures loose hay to minimise wastage.

This is our largest available cradle and the most popular cradle available on the market.

Don't muck around with a fragile import that will flex and bend after the first use. Paton's cradle design has decades of experience and valued customer feedback behind it.

### KEY FEATURES

- 3 round bales or 2 large square bales capacity
- Reduces wastage by 30%
- Keep hay elevated
- Easy to pick up and reposition
- Half skirt sheet base or Half skirt mesh base
- Fully galvanised finish
- Light weight structure
- Structurally strong and long lasting
- Suitable for sheep, goats, horses

### UNIT DIMENSIONS

- Length: 4000mm
- Height: 800mm
- Trough Base Height: 300mm
- Width 1600mm
- Bar Spacing: 250mm

Half Skirt Sheet Base – Product Code: HCS25G

Half Skirt Mesh Base – Product Code: HCS25M (as shown on photos)
