

Product code: **LFLLSF8M**

APPLICATION

These newly designed long feeding troughs are the most cost effective feeding method of supplementing large numbers of sheep.

Their large capacity and extra-long feeding area, combined with accurate feed control adjustment, means more animals get an opportunity to feed over the day.

A roll tarp cover, split into two parts provides a wide easy access to the main hopper for filling. Weather verandahs keeps rain out of the important feed space.

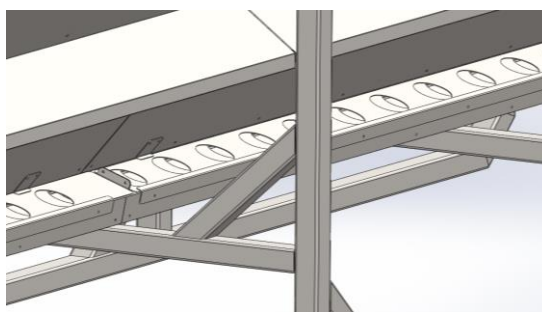

An ideal partner for feeding larger groups!

FEATURES

- 4 tonne capacity
- Adjustable feed control doors
- Rip stop roll tarp cover
- Under bin - weather verandas
- Clean Out Chute on ends
- Forklift Tyne tubing
- Tow points at one end
- 16m of feeding space
