

Mobile Cattle Trough – 6m

(Product code: FTMOBCATTLE6G)

Product Overview:

Paton mobile troughs are the most convenient, durable and practical way to deliver a premixed feed ration to a small group of cattle. These steel units can be towed to the feed source behind your ATV or Utility, filled, mixed and then towed to the animal group and left for the day.

Being a relatively lightweight unit and with the ability to be towed with an ATV, these troughs are ideal for use during the wetter months as they avoid the need for a tractor cutting up your paddocks.

They feature an ATV quick hitch and a front turntable able to rotate nearly 180 degrees. A strong sub-frame supports the trough and the capacity is approximately 1200 litres.

UNIT DIMENSIONS

- Unit Length: 6000mm
- Trough Width - 430mm (Base) x 770mm (Top)
- Trough Depth - 400mm
- Unit Height – 710mm
- Capacity – 1200mm
