

Product code: FTMOBCATTLE6GW

APPLICATION

These galvanised relocatable water troughs enable you flexible management in a rotational grazing program. This product will hold up to 1000 litres of water, providing a generous reservoir of drinking water to cattle. They come with a mounted 3/4 inch brass ball valve to regulate water flow and a removable cover plate to stop animals from access. A drain plug is also provided to empty when moving.

FEATURES

- Fully galvanised
- Holds up to 1000L of water
- A mounted ¾ inch brass ball valve for water flow regulation
- Removable cover plate
- Drain plug
