

'Soil Saver' Raised garden bed

Benefits

- 70% less soil
- Simpler setup
- No back breaking volume of soil
- Easily relocatable
- Higher concentration of soil nutrients
- Improved drainage, avoids waterlogging
- Improved soil temperatures, aids to better growth
- Better site accessibility

"Effortless set-up and filling"

Enjoy all the benefits of having a raised garden bed without the huge physical effort of shoveling a large volume of soil before you even get started

With this new and innovative raised floor design, the issue of how to fill your raised garden bed has now been eliminated, saving your back, time and money. Simply nominate the required height of your floor and fill from your chosen floor position.

Now you can afford to have the quality soil you want without the physical effort needed to get the bed ready for planting

This means it is now easy to relocate the bed for people renting and moving house. Simply dig up the soil, bag it or barrow it, pick up the bed and relocate it, then replant.

Features

- Galvanised finish
- Drainage holes
- Riveted joins
- Heavy duty

Save your back!!!
