

TRAIL FEEDER – 3 Tonne Capacity

Premium Model

(Product code TFPREM4G)

The Paton Trail Feeder 3 Tonne capacity trailer is the heavy lifting unit in the group.

The larger design allows it to carry heavy loads with ease behind your farm utility (up to 3 tonne). The trailer is well balanced and will tow evenly over paddock terrain, and at speed along country roads.

The larger capacity eliminates the need to return to refill, especially when the distance from storage to paddock is significant. This unit is suited to a larger farming enterprise with several mobs to feed from one fill.

This galvanised feed trailer offers a large roll over tarp cover that pulls down tight once filling is completed.

The premium model features a wireless 'operate from the cabin' handheld remote that enables feed doors to open and close at the press of a button.

The unit comes with a 50/50 split bin and features a mixing hopper with mechanical thrown manual chutes to control/restrict the flow from each bin as required. This way you can set the feed ratio from each bin, and so enable the right mix onto the ground.

FEATURES:

- 4 Tonne GVM (Requires special tow coupling)
 - Twin bins for mixing
 - 2 tonne capacity
 - Roll tarp cover
 - Galvanised finish
 - Rear tail lights
 - Rocker roller suspension
 - Jockey Wheel
