# WHEELED GRAIN FEEDERS

## APPLICATION

The Paton wheeled feeders allow you to tow your feeder full, from silo to paddock, and to also relocate the unit to minimize pasture damage.

The 1 tonne and 1.5 tonne feeders can simply be towed with your utility. These come with a jack stand to assist in the hitch to fixed height vehicles.

The 2 tonne, 3 tonne and 5 tonne feeders require a tractor and linkage bar to lift and tow.

The Paton wheeled feeders now can have a **new wheel position option** under the feeder which allows you to tow your feeder **full** from silo to paddock, with your **utility**.

## FEATURES

- Designed to tow with your utility
- Galvanised finish
- Easily relocatable
- Hitch options – 50mm towball, single tongue swivel or double tongue
- Strong supporting subframe
- Sight windows
- Adjustable feed doors
- Dual axle – 5 tonne model
